

Jonas Siltamäki Håkansson

Software Engineering consultant

Analytical, pragmatic and realistic. I prefer basing decisions on data and am not afraid to change my position if proven wrong. A born generalist who likes to get involved in every aspect of a business and is quick to adapt to do what needs to be done to get things moving. I enjoy efficiency and get restless by contentlessness. In my personal life, meditation and mindfulness has taught me to enjoy the moment and not get stressed out by a red light or a long queue.

Experience

Insclear

Frontend lead

2019-

.NET, ANGULAR, SQL SERVER, C#, TYPESCRIPT, AZURE DEVOPS, SERVICE FABRIC

System design and development using .Net, Angular and Azure DevOps. Included design and implementation of a web component based micro frontend architecture to streamline and decouple deliveries.

SEB

Solutions Developer / Designer

2018-2019

.NET, ANGULAR, SQL SERVER, C#, TYPESCRIPT, AZURE DEVOPS, IBM MQ, IBM API CONNECT

Full stack software development. Worked in a project to modernise the architecture of the systems handling settlement of securities, while also making SEB compliant in CSDR. The application I worked on provides a Rest API for securities settlement, also developed an MQ based solution to provide the same functionality for older systems.

Tattooimigo

Co-Founder, developer

2017-2018

.NET CORE, ANGULAR, SQL SERVER, C#, TYPESCRIPT, AZURE, NODE JS, SWISH API

As a co-founder I worked on everything from developing the initial idea into a sustainable business model to developing the platform. I worked closely with a very entrepreneurial person and my role

was often to take ideas and bring them down to earth. We completed each other very well and I enjoyed developing the business model and logistics.

I also helped develop the system architecture and website. I mainly worked on the frontend. The backend is written in C# using .Net Core and SQL Server and is hosted in Azure. The frontend is written in TypeScript and uses Angular 5 along with Angular Universal and is hosted on a lightweight Node JS server.

Additionally I acted supervisor for engineering students doing their examination work at Tatoomigo.

Signe.io

Co-Founder, developer

2016-2017

REACT, BOOTSTRAP, NODE JS, MYSQL, STRIPE API

I helped kick start Signe, working out the business model and branding while also building the first prototype version of Signe using NodeJS and MySQL for backend and React on the frontend.

Skandikon

Software Engineer

2014-2015

.NET, SQL SERVER, JQUERY, C#, JAVASCRIPT

System development, full stack development of a system for handling pensions. Programming in C# using .NET MVC, SQL Server and front end work in ASP / jQuery.

Plan 8 Production

Web Developer

2013-2014

JAVASCRIPT, JQUERY, BACKBONE, REQUIREJS, NODE JS, MYSQL, PHP

Continued to develop my school examination project Klang, which was used in collaboration with clients such as Google, H&M, Mercedes, HBO and many more. Also included full stack development of a cloud based system for handling audio files and adding music and sound to interactive websites built in JavaScript, PHP and MySQL. As well as web apps using Node JS.

Education

KTH Royal Institute of Technology

Bachelor's Degree, Computer Science

2010-2013

Stockholm University

Bachelor's Degree, Business Administration and Management

2015-2018

The Chinese University of Hong Kong Business School

Exchange term, Managerial Economics

2017

Certifications

Leading Yourself and Others
